PROFESSIONAL SUMMARY

Data Analyst and Business Analyst with 4 years of experience delivering data-driven solutions using SQL, Python, Power BI, Databricks, and Advanced Excel. Experienced in data analysis, dashboard development, data modelling, DAX, Spark SQL, data validation, and migration of legacy SQL/HQL workloads to Databricks. Skilled in translating business requirements into actionable insights, building reporting solutions, and collaborating with cross-functional and UK-based stakeholders to support data-driven decision-making.

TECHNICAL SKILLS

Programming & Data Analysis: Python, Pandas, NumPy, SQL, MySQL

BI & Visualization: Power BI, Tableau, DAX, Power Query, Data Modelling, Dashboard Development

Data Platforms: Databricks, Spark SQL, Hadoop, Hive/HQL, Amazon Redshift

Analytics & Business: Data Analysis, Data Validation, KPI Reporting, Advanced Excel, Alteryx, Requirement Gathering, Stakeholder Management

PROFESSIONAL EXPERIENCE

EXL

Apr 2025 – Present

Business Analyst

- Supported **5 major business processes** for a UK utility client, translating business requirements and ad hoc requests into validated datasets and reporting solutions using **Databricks and Spark SQL**.
- Migrated **35+ SQL/HQL scripts** from Amazon Redshift and Hadoop to **Databricks using Spark SQL**, standardizing script formatting and optimizing queries, reducing runtime of major scripts by **20%** while maintaining reporting continuity.
- Investigated **billing data using Python, Pandas, Tableau, and Alteryx** to identify unbilled leaving accounts requiring final bills despite reads being available, enabling targeted reporting and **process improvements** that improved **final-bill generation from 80% to 95%**.
- Analyzed **customer leaving and dispute processes using Power BI, DAX and data modelling**, monitoring leave-journey completion, final bill generation, read receipt, communication status, and dispute resolution KPIs; identified process gaps through flow checks, increasing **10-day completion from 90% to 93%**.
- Owned an end-to-end **Power BI dashboard** to **evaluate** product end-date extensions, product-switch reasons, and open-request ageing; identified **idle, overdue, and errored requests** through KPI analysis, improving **request-closing efficiency by 26%**.
- Handled 80+ ad hoc data requests** for UK stakeholders, delivering **90% within SLA** and independently managing complex requests through resolution; **5% of requests evolved into major projects**, requiring cross-functional coordination and end-to-end ownership.

TVS Credit

Jan 2025 – Mar 2025

Assistant Manager

- Developed **Excel dashboards and MIS reports** for daily delinquency monitoring, tracking non-payment ageing buckets up to **5 days**; automated recurring reporting using **Excel Macros**, Pivot Tables, INDEX-MATCH, and VLOOKUP.

PROFESSIONAL DEVELOPMENT & CAREER BREAK

Feb 2023 – Dec 2024

- Took a planned career break for competitive government examination preparation while continuing to strengthen data analytics skills through structured learning and hands-on projects. Completed the **IBM Data Analyst Professional Certificate** and **Codebasics Data Analytics Bootcamp**, gaining hands-on experience in Python, Pandas, SQL, Excel, Power BI, data visualization, and analytics projects.

Think & Learn Private Limited (BYJU'S)

Jul 2020 – Jan 2023

Senior Associate & Associate

- Leveraged MySQL, Power BI, and Power Query to assess scholarship test and student assessment data**, performing data cleaning, transformation, and exploratory data analysis to evaluate topic difficulty and accuracy, identify student strengths and weaknesses, and support personalized test recommendations using large tagged question datasets.

- Contributed to the BYJU'S Neo Classes project from ideation and sample collection through content preparation, coordinating with **4 subject teams** — Science, SST, Mathematics, and Biology — to segregate questions and support structured question supply for the new learning initiative.
- Built and maintained **Power BI dashboards and KPI reports** to **assess** student engagement, learning progress, dropout trends, and assessment performance, using **Power Query, data modelling, and Excel** to transform and visualize data, and presented analytical insights to cross-functional stakeholders through PowerPoint.

CERTIFICATIONS

IBM Data Analyst Professional Certificate — IBM / Coursera

Data Analytics Bootcamp — Codebasics

EDUCATION

Malaviya National Institute of Technology (MNIT), Jaipur

M.Tech in Production Engineering | 2018 – 2020

Rajasthan Technical University (RTU), Kota

B.Tech in Mechanical Engineering | 2013 – 2017

PROJECTS

Business 360 Dashboard | Power BI, MySQL, Power Query, DAX, Excel | [Live Dashboard Link](#)

IPL 2024 Analytics – Sports Magazine Project | Power BI, Power Query, DAX | [Live Dashboard Link](#)

Beverage Market Analysis | SQL, Power BI, Power Query, DAX | [Live Dashboard Link](#)
